

## Recombinant Rat Tumor Necrosis Factor- alpha

(rrTNF-α)

Catalog Number: 143-01

**Description** Tumor necrosis factor alpha (TNF-α) is produced by neutrophils, activated lymphocytes,

macrophages, NK cells, LAK cells, astrocytes endothelial cells, smooth muscle cells and some transformed cells. TNF- $\alpha$  occurs as a secreted, soluble form and as a membrane-anchored form, both of which are biologically active. The naturally-occurring form of TNF- $\alpha$  is glycosylated, but non-glycosylated recombinant TNF- $\alpha$  has comparable biological activity. The biologically active native form of TNF- $\alpha$  is reportedly a trimer. Two types of receptors for TNF- $\alpha$  have been described and virtually all cell types studied show the presence of one or both of these receptor

types.

Synonyms TNF-alpha, Tumor necrosis factor ligand superfamily member 2, TNFa, Cachectin, DIF,

TNFA, TNFSF2

**YFGVIAL** 

**Source** Escherichia coli

**Molecular Weight** Approximately 17.3 kDa. a single, non-glycosylated polypeptide chain containing 157 amino

acids.

**Purity** >95% by SDS-PAGE and HPLC analyses.

**Biological Activity** Fully biologically active. Specific activity  $\geq 5 \times 10^7$  units/mg, as determined by murine L929

cell cytolysis in the presence of Actinomycin D.

**Physical Appearance** White lyophilized powder.

**Formulation** Lyophilized from a 0.2 µm filtered concentrated solution in 20mM PB, pH7.2, 150mM NaCl.

**Endotoxin**  $< 1EU/\mu g$  of growth factor as determined by LAL method.

**Reconstitution** Reconstitute in sterile distilled water containing 0.1% BSA to a concentration of 0.1-1.0

mg/mL.

Storage Store at -20°C after receiving. Upon reconstitution, store at 2-8°C for up to one week. For

maximal stability, aliquot and store at -20°C. Avoid repeated freeze/ thaw cycles.

**Usage** This product is for research use only. It is not approved for use in humans, animals, or *in vitro* 

diagnostic procedures.
